TO: Minerals File

FROM: Tom Munson, Reclamation Specialist 

RE: Site Inspection, Dale Rogers, Pitchfork Springs Project, S/027/033, Millard County, Utah

Date of Inspection: May 7, 2001
Time of Inspection: 1:30 – 2:00 p.m.
Conditions: Sunny
Participants: Dale Rogers, Calvin Rogers, Operators; Tom Munson, DOGM

Purpose of Inspection: To check out reclamation to bring area below five acres

To access this site, go to Blackrock Road, take the turn to Wah Wah Ranch, which is 18 miles. Go all the way to the cattle guard which is probably 9 miles and turn left and come across the Wah Wah valley there. The old road that used to go into Pitchfork Springs has been dug up by a rancher putting in a water line. That water line then connects to a spring up the canyon where Dale is working. However, that road has now become inaccessible. When I arrived at the site, Mr. Rogers and his brother were taking stone off the mountain.

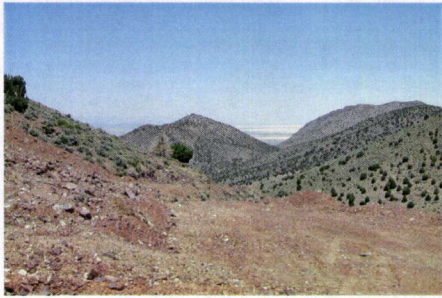

I looked at the reclamation by the farmer who Dale hired to reclaim the state road. The state section of the road has been regraded with a tractor and ripper. Pictures were taken. I have already GPS'd this area; therefore, I felt it unnecessary to GPS this site again.

Mr. Rogers is in the process of putting together a large mine plan. Dale's brother-in-law, Stuart, will call me Thursday or Friday and set up an appointment to go over what is needed for a large mine plan. A meeting was scheduled for 11 a.m. Monday May 14, 2001.

This site is now in compliance with the small mine rules. Mr. Rogers informed me that his Letter of Credit should be in to the BLM today for the BLM portion of the site under the 3809 rules. He should then be in compliance with the BLM. I will contact Larry Garahana of the Fillmore BLM office to verify this.
